Birla Institute of Technology and Science (BITS), Pilani | B. Tech. Marine Engineering | CGPA: **9.65/10** | 1st in Marine Eng. Aug'14 - Jul' 18

PROFESSIONAL EXPERIENCE

Director – Corporate Development and Strategy, MPS Limited (listed Indian Company, ~USD 450M market cap) Apr'25 - Present

M&A and Investments

- Set up MPS's corporate development function from scratch - M&A strategy, investment mandate, and operating model, institutionalizing a repeatable engine spanning sourcing, diligence, valuation, and integration
- Delivered MPS's largest-ever acquisition at USD 16.5M deal value by leading end-to-end execution of the Unbound Medicine transaction, spanning full-scope diligence, valuation, SPA negotiation, and CXO alignment
- Identified and engaged the diligence partners for finance, legal and tax and acted as an anchor for communications during the process
- Resolved post-close SPA misalignments on Unbound, including a tax-adjustment claim, across multiple negotiation rounds with sellers and sellers' counsel, holding a defined business position to protect MPS's economics
- Negotiated ~USD 1M of specific-indemnity purchase price adjustments, minimised general-indemnity exposure via tipping baskets, and secured an unlimited IP cap on the Unbound SPA, de-risking MPS's post-close liability
- Captured ~\$5M in synergies and expanded EBITDA margin from 15% to 30% by leading Unbound's cross-functional post-merger integration, building the value-creation roadmap and 30+ KPIs tying commitments to targets
- Submitted an LOI for an education carve-out in Germany via a staged ~EUR 966K Newco with an 80/20 earnout, structured through a German GmbH navigating German capital-maintenance rules to free up excess cash sitting in a subsidiary
- Re-cut a media-services LOI structure (India, Hong Kong, US) from a share deal to a Business Transfer Agreement with cash plus earnout after initial diligence uncovered fabricated work-in-progress, ring-fencing the risk
- Pressure-tested a distressed research & advisory target sourced via an IB Partner, stress-testing a ~USD 136M hockey-stick forecast against a 34% revenue decline and building a downside-protected valuation for the board
- Assessed a UK bibliographic data-as-a-service target (high-margin, recurring DaaS) offered through a Corporate Finance auction, preparing the screening note, valuation, and bid strategy for MPS.
- Built pipeline valuation models across live deals, including DCF (FCFF, WACC, beta relevering, terminal value) and trading and transaction comps, to anchor LOI pricing and board recommendations
- Expanded MPS's inbound deal funnel to 50+ screened targets and 10+ LOIs by building relationships across 30+ IBs and 15+ founders
- Built and led a 4-member corporate development team by defining roles, mandates, and decision rights to run deals end to end
- Empaneled 6 finance, legal, and tax diligence partners and aligned IB coverage into an on-call execution bench that mobilizes quickly
- Pre-built standardized diligence request lists (DRLs), cutting post-onboarding diligence TAT by ~3 weeks and sharpening valuation inputs
- Designed end-to-end deal process from NDA to IM to valuation, standardizing how each opportunity moves to a board-ready recommendation

Corporate Development, Capital Markets & Investor Relations

- Negotiated with multiple banks for a term loan for acquisition financing and supported a secondary raise process (ChrysCap, Capital Square, Kedaara, Samara) to fund the M&A program
- Engaged 20+ institutional investors by building the Quarterly/Annual Earnings Presentations and Corporate Investor Deck across QIP roadshows, earnings calls, analyst briefings, and one-on-ones in FY25 and FY26
- Drafted the MD&A section of Annual Report FY25, covering strategic priorities, risk factors, segmental performance, capital allocation, and the forward-looking business outlook
- Codified the organization's operating principles with the Senior Leadership Team (SLT) to standardize cross-entity decision-making and governance across the MPS group
- Built MPS's AI-first equity story for the secondary raise, repositioning the group around named AI products (DigiCorePro, AJE Rubriq, Unbound Intelligence) to reframe the narrative from services to AI-enabled IP
- Drove group portfolio strategy across 8+ operating entities (Highwire, AJE, SNAS, Liberate, TopSim, Unbound), aligning M&A, capital allocation, and the equity narrative under a single group thesis
- Led the redesign of the MPS website to support the latest AI-focused narrative, modernizing it for better comprehension by investors and customers alike

Marine Operations Manager, Northern Marine Management, United Kingdom

Nov'18 - Mar'24

- Held end-to-end accountability for maritime assets across 35 countries and 80+ international voyages, owning the trade-offs between operational risk, regulatory compliance, and commercial uptime
- Unlocked multi-million-dollar annual savings and emissions reductions by driving a fleet-wide digital-transformation agenda spanning IoT analytics, digital-twin route optimization, and spare-parts digitization
- Set fleet operating standards (priority frameworks, redesigned SOPs, and KPI scorecards) that informed shore-management decisions and scaled across the fleet
- Earned 3 promotions in 4 years (fastest in cohort) by consistently exceeding fleet uptime, safety, and cost KPIs set by leadership
- Sustained 99.4% uptime vs. 95% industry average over 2 years across commercial fleet by leading a team of 10+ on asset management
- Delivered 5 overhaul projects worth \$25M with zero commercial losses and zero injuries by leading a multinational team of 20+ engineers
